

R.V.R. & J.C. COLLEGE OF ENGINEERING

Academic Regulations

Academic Year: 2026–2027

Document ID: RVRJC-ACA-001

Version: 2.0

Effective Date: 01 July 2026

Policy Owner: Office of Academic Affairs

1. Introduction

The Academic Regulations establish the academic framework governing undergraduate and postgraduate programs offered by R.V.R. & J.C. College of Engineering. These regulations define requirements related to curriculum, credits, grading, academic performance, promotion, degree completion, and student progression.

2. Academic Programs

Major undergraduate programs include:

- Bachelor of Technology in Computer Science and Engineering
- Bachelor of Technology in Information Technology
- Bachelor of Technology in Electronics and Communication Engineering
- Bachelor of Technology in Electrical and Electronics Engineering
- Bachelor of Technology in Mechanical Engineering
- Bachelor of Technology in Civil Engineering

The standard duration of a Bachelor of Technology program is four academic years divided into eight semesters.

3. Academic Year and Semester

An academic year normally consists of two regular semesters: Odd Semester (July to December) and Even Semester (January to May). The College may conduct summer or supplementary terms when required. Each semester normally consists of approximately 16 to 18 instructional weeks, excluding examination periods and approved holidays.

4. Credit System

Academic programs follow a credit-based system. Theory courses generally carry 2 to 4 credits, while laboratory courses generally carry 1 to 3 credits. A standard undergraduate semester normally requires 18 to 24 credits. Students must successfully complete the minimum credit requirement specified for their program to receive the degree.

5. Course Categories

Foundation courses establish fundamental knowledge. Core courses provide essential discipline-specific knowledge. Professional electives provide specialization. Open electives may be selected from approved courses

offered by other departments. Laboratory courses provide practical experience. Final-year students are required to complete an approved project or equivalent capstone activity.

6. Grading System

The College follows a letter-grade system.

Grade O = 10 points (Outstanding)

Grade A+ = 9 points (Excellent)

Grade A = 8 points (Very Good)

Grade B+ = 7 points (Good)

Grade B = 6 points (Above Average)

Grade C = 5 points (Satisfactory)

Grade P = 4 points (Pass)

Grade F = 0 points (Fail)

A minimum grade of P is required to pass a credit-bearing course unless a higher requirement is specified.

7. Semester Grade Point Average

$SGPA = \Sigma(\text{Credit} \times \text{Grade Point}) / \Sigma(\text{Credits})$

8. Cumulative Grade Point Average

$CGPA = \text{Total Weighted Grade Points} / \text{Total Earned Credits}$. The transcript records semester-wise SGPA and cumulative CGPA.

9. Academic Progression

Students are expected to complete courses according to the prescribed curriculum. Students with failed courses may clear them in subsequent examinations. Academic progression may be restricted when a student accumulates an excessive number of failed or incomplete courses.

10. Course Failure

A student receiving an F grade must repeat the course or appear for an approved supplementary or repeat examination, subject to applicable regulations. Prerequisite requirements must be satisfied before registering for dependent courses.

11. Degree Requirements

To receive a Bachelor of Technology degree, a student must complete compulsory courses, required electives, laboratory requirements, the prescribed project, minimum credits, attendance requirements, and all academic and administrative obligations.

12. Academic Integrity

Plagiarism, fabrication of results, unauthorized collaboration, impersonation, and other forms of academic misconduct are prohibited and may result in disciplinary action.

13. Academic Advising

Every student is assigned an academic advisor who assists with course registration, academic planning, elective selection, academic difficulties, graduation planning, and referral to student support services.

14. Academic Appeals

Students may appeal an academic decision through the prescribed procedure. Appeals should normally be submitted within seven working days.

15. Amendments

The College may amend academic regulations based on decisions of the Academic Council. Amendments will be communicated through official College channels.
